# Deliver secure, easy access to case materials in the cloud

**Courts are the key institution to building fair, effective, and dependable justice, but are challenged by disconnected systems, increasing caseloads and rising case backlogs.**

Thomson Reuters latest solution reduces demands for continuations and other delays by making materials instantly available to all parties in the cloud. Cases progress more quickly with intuitive, easy-to-use markup tools, integrated case presentation, increased search efficiency, and an intuitive design that requires fewer clicks to find case materials.

Refocus time with tools that allow you to concentrate on the advocacy versus the administration of justice. By connecting case preparation and presentation customers report:

- Up to a 50% reduction in the number of hearings required to conclude a case
- Reduced workload for judges and staff with a common book of case materials
- More productive hearings with a single cloud solution for courtroom presentation

## A unique set of case preparation and presentation features

The platform, powered by CaseLines, gives you the tools to organize, share, review and present documentary and multimedia case materials in a single cloud-based repository.

### Organize

All files uploaded are automatically indexed and fully searchable. In a single browser you can view case documents, PDFs, images and multimedia.

### Prepare

Provide access to case materials according to permissions. Easily locate key case materials, timestamp media, add notes, redact and mark exhibits.

### Present

Direct others to the right page with purpose-built presentation tools that allow you to present documents and multimedia within the browser.

"I cannot overemphasize how much of a game-changer CaseLines is. CaseLines will allow us to spend more time dealing with the substance of the matters before us and less time on trying to sort through reams of paper just to find the one document we were looking for."
**Chief Justice Morawetz, Chief Justice of the Superior Court of Justice, Ontario, Canada**

# Connect Case Preparation and Presentation

### Maintain Case Control

Bring together case documents and media into one platform. Everything uploaded is automatically paginated, indexed and fully searchable for faster case review.

### Powerful Search Tools

Search across all case materials, including handwritten documents and images, with Boolean and natural language search capabilities.

### Smarter Annotation

Notes stay in place even as new documents are added so you can start annotating your case earlier. Keep notes private, share with colleagues or all case parties.

### Admit Evidence

With all files in one place you can admit documents, PDFs, images, video and audio into evidence in one platform. All without leaving your browser.

### Direct

Ensure everyone is always on the same page. Direct everyone in a hearing to the right page of the case at the touch of a button, in real time.

### User Specific View

Create subsets of case materials holding selected files. Create subsets for disclosure, exhibit lists or a witness file ensuring users only see materials they are permitted to view.

### Secure Share

Invite your team into each case. Users are notified as new materials are added to the case so you always know you are working from the latest case file.

### Compare materials

Easily compare case materials with side-by-side review. Place documents, video or audio side by side to build your case and add hyperlinks to connect case materials as you review.

### Redact

The in-built redaction suite allows you to search and redact key terms across your entire case. Users can even label redactions for efficient review.

### Watch

Watch videos within the case with no need to leave your browser. In a hearing play, pause, jump forward and back in unison with no need for DVDs or third party players.
