Courses are driven by practical examples and interactive scenarios to ensure users truly understand and recognize the issues of most importance to your business and learn to instinctively act to support them.

Make learning an impactful experience
Our highly interactive approach to compliance training provides employees with an engaging educational experience while meeting their learning objectives. The design of your organization's courses influences how employees perceive and experience the content. Photographs, illustrations, videos, animations, color and typography are used to highlight important information and tell a story, making it easier for employees to understand, interact with and navigate through their courses.
**Thomson Reuters Microlearning**

Thomson Reuters Microlearning keeps your managers’ and employees’ knowledge and skills up to date through a process of continuous education. Our library consists of short and impactful learning modules that reinforce key compliance concepts and is intended as a supplemental solution to our market-ready compliance training courses. This learning suite changes the approach to online compliance training from a once-a-year event to a steady flow of interesting and informative trainings that reinforce both the “tone at the top” and your organization’s core values.

**Gamification**

Gamification has become an increasingly effective learning tool, as courses that utilize it provide a fun and interactive way for employees to engage with the content.

The underlying objective of investing in compliance training is not only that employees start and finish a course, but also that they understand the content and apply it in their day-to-day business activities. The game-based learning method can exponentially increase attention, engagement and knowledge conversion by clarifying abstract and difficult concepts.
