

Westlaw Edge Quick Check

Discover a new level of confidence

Upload your briefs and motions to Quick Check on Westlaw Edge and receive a comprehensive report detailing not only the validity of the cited authority, but also recommendations for additional relevant authority as well as an analysis of case quotations.

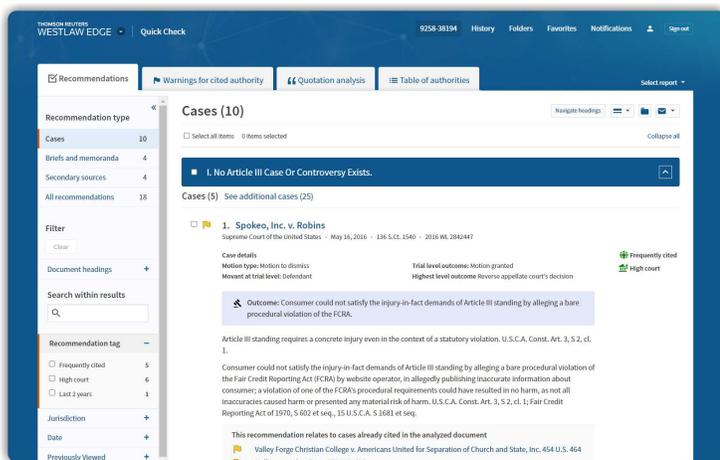

Intelligent document analysis

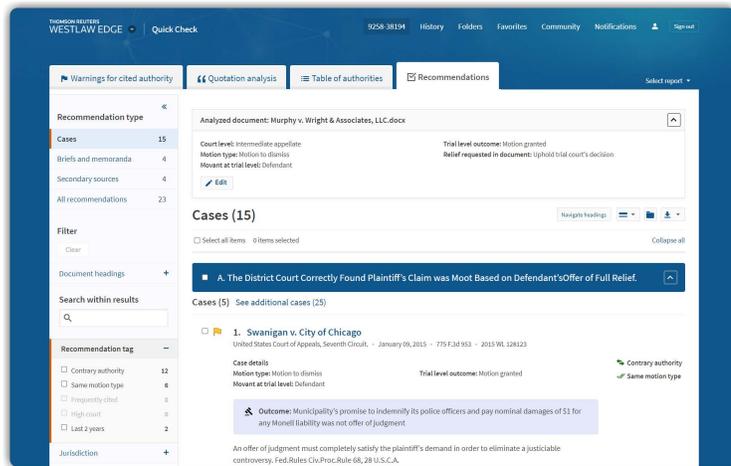

Quick Check leverages advanced artificial intelligence to examine the text, citations, and structure of the uploaded document to detect the legal issues covered. It then identifies recommendations that are relevant to the issues in the uploaded document, but not otherwise cited. The resulting report also includes warnings for cited authority, an analysis of quotation accuracy, and a table of authorities.

Check your work

Quick Check makes it easier than ever to safeguard your work. Quickly determine the validity of your citations and quotations, plus view additional relevant authority that traditional research may have missed. Use Quick Check to perform a final check on a completed brief, refresh a previously used document, or examine an early draft.

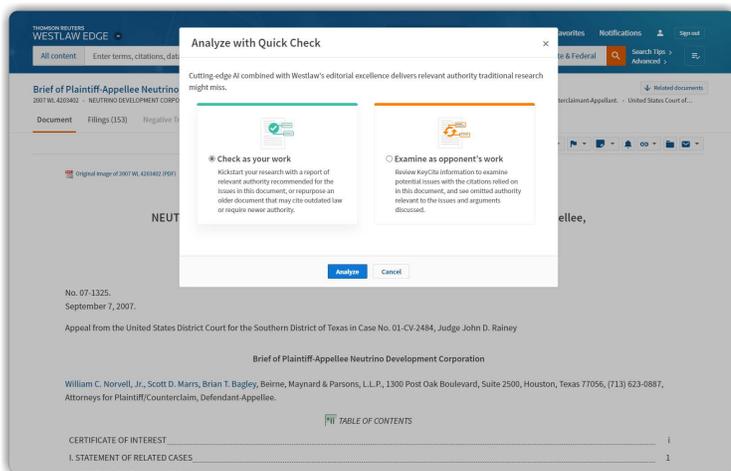

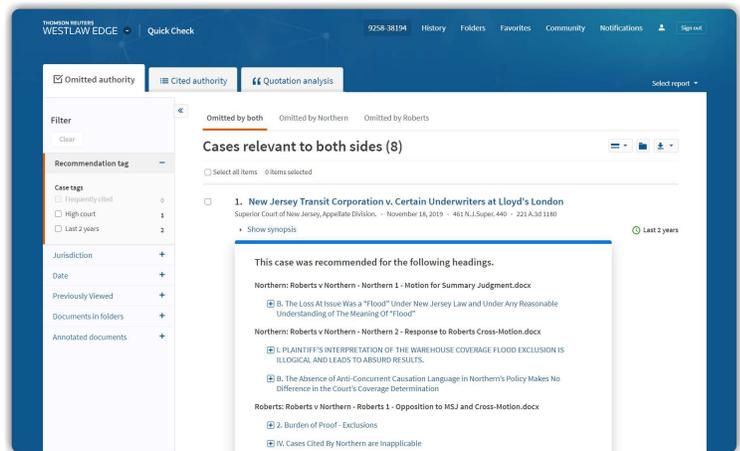

Analyze an opponent's work

Discover a deeper level of insight into your opponent's briefs and motions. Quickly identify potential issues with your opponent's cited authority and quotations. Plus, strengthen your argument with the ability to quickly find relevant authority contrary to the positions in your opponent's filing.

Quick Check Judicial

With Quick Check Judicial you can analyze multiple filings from a single matter. Upload up to six documents and receive an easy-to-review report where you can compare the citations relied upon by each party, uncover relevant authority that was omitted, and quickly verify the accuracy of quotations and citations.

Submit to Quick Check

Jumpstart your research by combining the power of Quick Check with the vast library of appellate briefs available on Westlaw Edge. Find a useful brief for your issue and submit it directly to Quick Check to view relevant authority and KeyCite information.
