

Case Timeline 3.1 – Release information for January 2021

The following improvements correct known issues from earlier versions:

Text file with events now import successfully

Users can import a text file with events through the File > Import menu while creating a new timeline on the splash screen without performance issues.

Existing timelines can now be changed and saved successfully

Users can make changes to an existing timeline, such as enter new data, start date, place, notes, and then save the timeline successfully without performance issues.

Case Timeline 3.0 – Release information for January 2017

The Westlaw Case Timeline release includes the following enhancements:

Support for Custom Properties

Create and manage custom properties, as well as import data files from Case Notebook and other sources with custom properties to display with events in Case Timeline.

Import Key Facts from Case Notebook with links to Source Documents

Case Timeline receives full text copies of source documents as sources from Case Notebook Key Facts.

Case Timeline can also link back to the original source document view in Case Notebook.

Event Entry Table Improvements

The event entry table is more useable with improvements to click behavior, hover behavior, vertical column and horizontal row sizing.

Customize Chart Event Information Boxes

Choose which information displays in the Event Information box for each chart.

Compatibility with Windows Server 2016

Added compatibility with the Microsoft Windows Server 2016 operating system.

Case Timeline 2.6 – Release information for June 2016

The Westlaw Case Timeline release includes the following enhancements:

Change desktop icon to match Case Notebook

Desktop icon for Case Timeline will now share the appearance of the other Case Notebook applications.

Compatibility with Windows 10

Added compatibility with Microsoft Windows 10 Home and Pro operating systems.

Compatibility with Office 2016

Added compatibility with Microsoft Office 2016.

Replace PDF Exchange with Nova PDF

Nova PDF replaces PDF Exchange as the PDF print driver in Case Timeline 2.6 for improved PDF printer performance.

The following improvements correct known issues from earlier versions:

Improved performance of links to charts in Case Timeline

Linking of files to charts within Case Timeline, particularly the appearance of linked pictures, is enhanced.

Improved performance of the Case Timeline Viewer application
