About Drafting Assistant

The Thomson Reuters Drafting Assistant suite of productivity tools provide easy access to information, research, authority, and tools to help you draft legal documents. With Drafting Assistant, you can produce your best work and shave hours off the drafting process – right from your word processor. With Drafting Assistant, you can:

- Analyze and review document drafts to find and address potential errors, omissions, and inconsistencies using **Deal Proof** (see "About Deal Proof" on page 27 for more information).
- Utilize **Templates and Sample Documents** to speed up the drafting process (see "Working with Templates and Sample Documents" on page 10 for more information).
- Ensure correct citation formatting using **The Bluebook**, **ALWD Citation Manual**, or other jurisdiction-specific rules, with the **Cite Formatting** tool (see "About Cite Formatting" on page 39 for more information).
- Use the **Document Formatting** tool to verify whether your document is formatted in accordance with your jurisdiction's court rules (see "About Validate Document Formatting" on page 43 for more information).
- Quickly find authority for language in your document using **Locate Authority** (see "About Locate Authority" on page 45 for more information).
- Insert a table of authorities into your documents with the **TOA Builder** tool (see "About TOA Builder" on page 48 for more information).
- Insert **KeyCite** flags for easy review and verify citations using the **Flags & Links** and **WestCheck** tools (see "About Flags & Links" on page 57 and "About WestCheck" on page 62 for more information).
- Check the status of your citations in KeyCite using **WestCheck** (see "Checking Citations" on page 65 for more information).
- Create a Cited Decisions list of cases cited by your case in **WestCheck** (see "Creating a Citations List" on page 67 for more information).
- Use WestCheck to access **QuoteRight** to verify the accuracy of quotations in your documents (see "Verifying Quotations with QuoteRight" on page 70 for more information).
- Create a package of all important legal sources referenced in your document using **Authority Compiler** (see "About Authority Compiler" on page 75 for more information).
- Build documents from templates created for your organization in Contract Express with the **Build Document** tool (see "About Build Document" on page 79 for more information).
- Convert PDF files to Word documents to utilize Drafting Assistant features on these files. (see "Converting a PDF Using Drafting Assistant" on page 9 for more information).
- Search **West km** and **Westlaw** and incorporate information in your draft documents (see "About West km" on page 16 and "Searching Westlaw" on page 12 for more information).
- Launch **Firm Central**, **Concourse**, and **Practical Law** (for more information, go to legalsolutions.thomsonreuters.com/law-products/support/contact-us).

Save hours of drafting time and speed up the review process with every brief, memorandum, or other legal document you draft. For detailed instruction on working with the Drafting Assistant tools, see:

- "Working with Templates and Sample Documents" on page 10
- "Practical Law" on page 11
- "Searching Westlaw" on page 12
- "Working with Case Notebook Data" on page 13
- "About West km" on page 16
- "About Deal Proof" on page 27
- "About Locate Precedent" on page 37
- "About Cite Formatting" on page 39
- "About Validate Document Formatting" on page 43
- "About Locate Authority" on page 45
Once you launch Drafting Assistant, the available tools display in the left pane alongside your document or in the Drafting Assistant toolbar. For more information, see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6.

Accessing Drafting Assistant Tools from Your Word Processor

To work with the Drafting Assistant tools while drafting a document in Word or WordPerfect, use the Drafting Assistant toolbar. This toolbar provides access to all of the Drafting Assistant tools and to launch Firm Central, Concourse, and Practical Law (for more information, go to legalsolutions.thomsonreuters.com/law-products/support/contact-us).

1. Open your legal document in Microsoft Word or Corel WordPerfect.
2. Do one of the following:
   • In Microsoft Word 2007 or later, a Drafting Assistant tab is added to the ribbon upon install of Drafting Assistant. Click the Drafting Assistant tab, then click the DA or a Drafting Tools button.
   • In Corel WordPerfect, a Drafting Assistant toolbar is added to the ribbon upon install of Drafting Assistant. Click the Drafting Assistant.*
3. At the prompt, sign in with your OnePass user name, password, and client identifier. The Drafting Assistant tools display in the left pane alongside your document.
In an effort to streamline our development process and provide our valued customers with more enhancements on preferred platforms, we are retiring support for some of Drafting Assistant tools for Corel WordPerfect. Beginning with Drafting Assistant 4.360.1061 and higher, only Flags & Links and WestCheck will be available for use within the software in WordPerfect. Subscribers will be able to use Cite Formatting, TOA Builder, and Deal Proof through drafting.westlaw.com. You may continue to use supported versions of the software that include features that are no longer available in WordPerfect. However, these features will not be eligible for bug fixes or ongoing enhancements. If you have additional questions, please call 1-800-WESTLAW.

**SETTING DRAFTING ASSISTANT OPTIONS**

You can customize many aspects of Drafting Assistant in Word by clicking **Options** on the Drafting Assistant toolbar (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information). For example, you can select a default placement for the document viewer window, select a default jurisdiction for Validate Doc Formatting, and choose whether to update Templates and Sample Documents content automatically or manually.

**Customizing the Document View**

Specify the default location for the document view and the location for viewing Templates and Sample Documents in Word.

1. Click **Options** on the Drafting Assistant toolbar in Word and click the **Drafting Assistant** tab.
2. Click **Document View** at the top of the window.
3. Select an option for the default location for the viewing pane.
4. Select a location to view open templates and sample docs.
5. Click **Save** to apply changes.
6. Click **Close**.

**Setting a Default Jurisdiction for Validation**

Select a default jurisdiction and select rules to omit when using Validate Doc Formatting in Drafting Assistant.

1. Click **Options** on the Drafting Assistant toolbar in Word, and click the **Drafting Assistant** tab.
2. Click **Rules** at the top of the window.
3. Select a jurisdiction from the **Default Court for Validation** list.
4. Optionally, select rules to omit from the **Skip the Following Rules When Running Validation** list of options.
5. Click **Save** to apply changes.
6. Click **Close**.
Customizing Content Updates

When you install Drafting Assistant, model documents and sample forms are automatically installed with the software and are available in the Templates and Sample Documents folders. Drafting Assistant allows you to customize your content updates.

1. Click Options on the Drafting Assistant toolbar in Word, and click the Drafting Assistant tab.
2. Click Content Updater at the top of the window.
3. By default, Drafting Assistant automatically updates content. To change the update mode to manual updates, select Manual. To manually update content:
   - Click Update to check for content updates now.
   - Click Reset to get all new content on the next update.
4. Click Save to apply changes.
5. Click Close.
Converting a PDF Using Drafting Assistant

If the document you need to work with is a searchable or image-based PDF, it is possible to convert that file to a Word document to utilize tools available in Drafting Assistant for that document. As the PDF is converted, any image-based text will be converted to plain text using Optical Character Recognition services.

1. Open Microsoft Word. Click the Drafting Assistant tab and then click the DA button.
2. At the prompt, sign in with your OnePass user name, password, and client identifier, if required. The Drafting Assistant tools display in the left pane.
3. Click PDF Converter.
4. In the next window, select the PDF you want to convert.

Drafting Assistant will automatically begin converting the PDF into a Word document. When the process is complete, the converted document will appear in a new instance of Microsoft Word. The tools menu will be open for you in the converted document for you to use applicable Drafting Assistant features and functionality.
Drafting Assistant provides templates and sample documents from your jurisdiction to assist you in drafting your own documents.

**USING TEMPLATES & SAMPLE DOCUMENTS**

To access a template or sample document:

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click **Templates and Sample Documents** on the Drafting Assistant toolbar.

2. In the **Templates & Sample Documents** category on the left, expand or collapse the folders provided and double-click to open a template or sample document as a new document.
WORKING WITH THE DOCUMENT VIEW

The document view displays documents that you access in Drafting Assistant or retrieve from Westlaw. You can change the location of the document view. You can also move selected document text or an entire document from the document view to a document in the drafting pane. To change the location of the viewer or to change the default location of the viewer, see "Setting Drafting Assistant Options" on page 7.

Moving Text from the Document View to Your Document

To move selected text from the document view into your document, select the text in the document view, and then do one of the following:

- Drag the text or an entire document into the drafting pane.
- Click in the draft document where you want to insert the selected text, and then click Send in the document view.

Practical Law

Use Practical Law to make sure your document reflects current legal and market standards. Practical Law’s Standard Documents and Clauses integrates into Drafting Assistant–Transactional seamlessly to provide clause-by-clause drafting guidance.

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click Practical Law on the Drafting Assistant toolbar.

2. Type your search terms in the box and click the magnifying glass to search.
3. Click a practice area to browse Practical Law documents, if desired.
4. You can copy and paste text directly into your draft document while viewing a Practical Law document.
5. Click Open to open the Practical Law document in your word processor, if desired.
Searching Westlaw

You can access Westlaw directly from Drafting Assistant and then add information from your search result to your draft document. The Search Westlaw tool available on the Word Drafting Assistant toolbar allows you to easily retrieve briefs, motions, cases, statutes, KeyRules, and forms.

For complete information on using Westlaw, visit legalsolutions.thomsonreuters.com/law-products/westlaw-legal-research/training-support to view and download user guides, explore training options, and watch tutorial videos.

SEARCHING WESTLAW

To retrieve a case on Westlaw, complete the following:

1. Click Search Westlaw on the Drafting Assistant toolbar in Microsoft Word (see “Accessing Drafting Assistant Tools from Your Word Processor” on page 6 for more information).
2. Select a category from the left. To browse the content, simply click a category on the search page.
3. Optionally, type a Terms and Connectors query or keywords describing your issue in the search box and click the **Search** button. Westlaw recognizes whichever search format you use. To select a different state or federal jurisdiction, click **Change**, select your desired options, and click **Save**.

**VIEWING A SEARCH RESULT**

View the results of your search using any of the following options:

- Click the link for a document to display the full text of a document in the document view. You will be able to view West Key Numbers, Headnotes, full text cases, and statutes with annotations, all within your word processor.
- To copy text from a Westlaw document and insert it into your draft document, select text in the Westlaw document view and click **Send**. The text you have selected will be placed in your document at the location of the cursor. The corresponding citation for the Westlaw document will be inserted with the text you selected according to your Westlaw citation format preferences.
- You can also select text in the document view and drag it to your draft document. Note that using this method will not place the citation reference in your document.

**Working with Case Notebook Data**

A licensed, installed version of Case Notebook integrates with Drafting Assistant allowing you to view and work with transcripts, documents, pleadings, and research documents from within Word. When you import additional transcripts, documents, pleadings, and research documents into Case Notebook, the data automatically displays in the associated category in the Drafting Assistant Case Notebook pane. For complete information on using Case Notebook, download a free copy of the Case Notebook User Guide at [http://legalsolutions.thomsonreuters.com/law-products/c/p/990001143](http://legalsolutions.thomsonreuters.com/law-products/c/p/990001143).
VIEWING AND SENDING CASE NOTEBOOK DATA

View or send Case Notebook data using Drafting Assistant:

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click the Case Notebook tool on the Drafting Assistant toolbar.

2. Select a Case Notebook case from the Select Matter list. Categories of case data display on the left side of your document.

3. Click to open a category (for example, Pleadings) and double-click any item in a category to display that information in the viewer. If you open multiple items in the viewer, tabs display for each item. Click the close button (X) to close a tab, if desired.

4. To change the location of the viewer, click one of the following options:
   - Bottom. Opens the viewer to the left of the document at the below the Westlaw Case Notebook pane.
   - Overlay. Opens the viewer to the left of the document.
   - Popup. Opens the viewer in a separate window.

5. While viewing Case Notebook data, you can select and insert text into your document. Select the text in the viewer, click where you want to insert the text in your draft document, and click Send in the viewer. To view the document in Case Notebook, click Case Notebook in the viewer.

6. If you are working with Image or PDF files, you can select and drag text from the viewer to your draft document. If you do not want to select and drag text, select text in the viewer, click Send list (→Send), and select one of the provided options. The document (or selection) displays in your drafting document and is available to use with Drafting Assistant features, including those that leverage document text and citations.
WORKING WITH CASE NOTEBOOK REPORTS

Use Drafting Assistant to generate Case Notebook reports for annotations, issues, key facts, cases, and full-text search.

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click the Case Notebook tool on the Drafting Assistant toolbar.

2. Click the Report list and select the type of report you want to generate. For detailed information on generating reports in Case Notebook, refer to the Case Notebook User Guide at http://legalsolutions.thomsonreuters.com/law-products/c/p/990001143.

3. After you generate the report, click the Send list in the viewer and select to send the Active Item or All Items to your draft document.
About West km

West km is a knowledge management product that helps you easily find and reuse your organization’s best work. In Drafting Assistant, you can search your organization’s West km content—such as briefs, pleadings, and memos from your litigation collection, or agreements, forms, and regulatory filings from your transactional collection—and then use that content as you draft new legal documents.

Features are launched from within Microsoft Word.

- To access West km documents in Drafting Assistant, click the Search km tool on the Drafting Assistant toolbar in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information).
- To search West km Litigation documents, click the type of search you want to perform, type your Terms and Connectors query or Natural Language description in the box, and click Search. If desired, you can restrict your search to particular library groups or specific fields (types of data). For more information, see "Searching in West km" on page 16.
- To search West km Transactional documents, click the type of content you want to search, type your search terms in the appropriate boxes, and click Search. If desired, you can restrict your search to particular library groups or specific fields (types of data). For more information, see "Searching in West km" on page 16.
- When you type search terms, you can use connectors and special characters to change relationships between your search terms and retrieve variations of search terms. For details, see "Using Terms and Connectors" on page 24.
- To view a document in a search result, click its title. For details, see "Viewing Documents and Summaries" on page 20.
- To view a summary of a document, click Summary when viewing the search result or a document. For details, see "Viewing Documents and Summaries" on page 20.

Searching in West km

Your West km content is integrated with Drafting Assistant to help you draft legal documents. In Drafting Assistant, you can search your organization’s West km content—such as briefs, pleadings, and memos from your litigation collection, or agreements, forms, and regulatory filings from your transactional collection—and then use that content as you draft new legal documents. You can also insert KeyCite status flags for each citation in your document, create links from citations to the full-text documents on Westlaw, and easily access citing documents in your organization’s West km content.

**SEARCHING LITIGATION DOCUMENTS**

You can quickly search for specific text in a West km document or for the title of a document.

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click the Search km tool on the Drafting Assistant toolbar.
2. Select Litigation from the West km list.
3. Type a **Terms and Connectors** query or a **Natural Language** description in the box and select the appropriate link. By default, the OR connector is used between terms. To view connectors and special characters you can use between terms, see "Using Terms and Connectors" on page 24.

4. Select or clear check boxes on the **Library Groups** panel to include or exclude library groups from the search.

5. If you are using a Terms and Connectors query, you can restrict all or part of your search to specific fields (types of data) on the **Fields** panel.
   - Type or select information in one or more fields on the **Fields** panel to add the field criteria to the search. By default, the AND connector is used to connect field criteria.
   - As an alternative to using the **Fields** panel, you can restrict your search by adding field restrictions to a full-text search. This method allows you to use field restrictions with special characters and connectors other than AND between fields. For details, see "Using Field Restrictions" on page 22.

6. Click **Search**.
The list of documents matching your search criteria display. For details, see "Browsing a Result List" on page 20.

SEARCHING TRANSACTIONAL DOCUMENTS

You can quickly search for specific text or for the title of a document, clause, or defined term.

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click the Search km tool on the Drafting Assistant toolbar.

2. Select Transactions from the West km list.

3. Click the type of content you want to search: Documents, Clauses, or Defined Terms.

4. Type your search terms in the Title and/or Text boxes.
   - By default, the AND connector is used between terms to retrieve one or both terms. For example, type partner liability to retrieve transactional documents that contain both of the terms partner and liability. To view connectors and special characters you can use between terms, see "Using Terms and Connectors" on page 24.

5. If you search by title and want West km to automatically add root expanders, synonyms, and related concepts to your search terms, select the Expand check box.

6. Select or clear check boxes on the Library Groups panel to include or exclude library groups from the search.
7. To restrict your search to specific fields (that is, types of data), enter criteria on the **Fields** panel. For example, you might want to restrict your search to documents written by a single author.
   - Type or select information in one or more fields on the **Fields** panel to add the field criteria to the search. By default, the AND connector is used to connect field criteria.
   - As an alternative to using the **Fields** panel, you can restrict your search by adding field restrictions to a full-text search. This method allows you to use field restrictions with special characters and connectors other than AND between fields. For details, see "Using Field Restrictions" on page 22.

8. Click **Search**.
The list of documents matching your search criteria display.

### BROWSING A RESULT LIST

Retrieved documents display in the result list. To view a document, click its title. For more information, see "Viewing Documents and Summaries" on page 20.

- Documents retrieved from a search are listed in reverse chronological order (based on the date the document was last modified), in order of relevance, or by the number of term hits, depending on your organization's settings.
- To change the sort order of the result list, point to **Sort By** at the top of the result list and then click a category.
- When the result list has more than 20 listings, click the **Next** arrow to view additional listings.
- For each item in a search result, the first three search terms are shown in the result list with surrounding document text and the search terms are highlighted in yellow.
- To view a summary of a document, click the **Summary** link. For details, see "Viewing Documents and Summaries" on page 20.
- To change your search, click **Edit Search**.
- To print the result list, click the **Print** button at the top of the result list.

### Viewing Documents and Summaries

After searching for documents using West km, you can access the full document text or a summary of document from the search results list.

#### VIEWING A DOCUMENT

To view the full text of a West km document, clause, or defined term, click its title in the search result.

- Search terms are highlighted and the first occurrence of the term automatically displays.
- Click the citation to go to the cited document on Westlaw.
- For each citation that has available KeyCite information, a KeyCite status flag is displayed before the citation. To access additional KeyCite information for the citation, click the flag. For more information, see "About KeyCite Status Flags" on page 66.
For each citation that is referenced in other indexed documents at your organization, the km icon displays after the citation. Click the icon to view the citing documents.

You have the following options:

- Select and drag text from the West km document to your draft document.
- Click Print at the top of the document.
- Click the Load Copy button to open a copy of the document in its original format.
- Click Return to Search Results to return to your search results.
- Click Summary to view details about the document.

**VIEWING A SUMMARY**

You can view the summary of a West km document that you have retrieved. When searching Transactional content, you can also view summaries from retrieved clauses and defined terms. To access a summary, click Summary next to the document title or at the top of the document. Document summaries may include the following sections:

- **Document Profile**: Displays data that was generated by West km during analysis. Click a link in the profile to go to the reference.
- **File Profile**: Displays metadata such as file title, author, created and modified date, and client and matter information. The library groups (for example, office locations) to which the document is assigned are also included.
- **KeySearch Topics** (Litigation documents): Displays the topics to which the document is assigned.
- **Outline** (Transactional documents): Displays an outline of the document. Click a link in the outline to go to that section.
- **Defined Terms** (Transactional documents): Click a term to go to its definition in the text of the document or clause.
- **Referenced Documents** (Transactional documents): Shows a list of all documents explicitly referenced in the document you are viewing. Click a document title to go to its reference in the document you are viewing.
The following is only applicable to summaries of Transactional documents:

- Clause summaries include a clause and document profile, outline, and defined terms, if applicable.
- Defined term summaries include a defined term, document profile and an outline.
- If multiple instances of the same metadata, defined term, or referenced document are found, the item is listed only once in the summary. The number of instances display in parentheses after the item. Click the item to go to the first instance in the text of the document or clause.

**Using Field Restrictions**

As an alternative to using the Fields panel, you can restrict your search by adding field restrictions to a full-text search. This method allows you to use field restrictions with special characters and connectors other than having AND between fields for transactional documents or having OR between fields for litigation documents.

The types of field restrictions available may depend on what type of document you search. The following types of field restrictions may be available to you:

<table>

The court, doc type, and jurisdiction fields are phrase indexed, so you must search for the terms exactly, including punctuation and spacing. As an alternative to typing the complete exact phrase, you can use the root expander (!) at the end of the term, for example, `docty(memo!)`.

To search for a judge’s name in both judge fields simultaneously, type `jp,js(judgename)`, for example, `jp,js(halbrooks)`.

Document fields may only be available for litigation documents.

### DOCUMENT ANALYSIS FIELDS

<table>
<thead>
<tr>
<th>Field</th>
<th>Abbreviation</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Attorney</strong></td>
<td>at</td>
<td>at(carla /3 rodriguez)</td>
</tr>
<tr>
<td><strong>Law Firm</strong></td>
<td>lf</td>
<td>lf(peterson /3 office)</td>
</tr>
<tr>
<td><strong>Governing Law</strong></td>
<td>gl</td>
<td>gl(california)</td>
</tr>
<tr>
<td><strong>Parties</strong></td>
<td>par</td>
<td>par(citran &amp; cornell)</td>
</tr>
</tbody>
</table>

Document Analysis fields may only be available for transactional documents.

Depending on the data from your organization’s document management system, the Governing Law field can contain different variations of a jurisdiction name, such as California, State of California, or CA. When you sort result lists by this field, variations can cause results from the same jurisdiction to be grouped separately (for example, California before State of California).

### Using Terms and Connectors

You can use connectors and special characters to change relationships between your search terms and retrieve variations of search terms.

### CONNECTORS

Use connectors to specify the relationships that must exist between the terms in your retrieved litigation documents.

</table>

ROOT EXPANDER
To retrieve words with variant endings, type the root expander (!).

Type: To retrieve:

object! object, objected, objection, objecting

UNIVERSAL CHARACTER
To represent one variable character, type the universal character (*).

Type: To retrieve:

jur** jury, juror (but not jurisdiction)

AUTOMATIC PLURALS AND EQUIVALENT TERMS
By default, searches retrieve plural forms and equivalent terms. To find the exact term you specify in the search, type the # symbol in front of the term.

Type: To retrieve:

#damage damage (not damages)
#willful willful (not wilful)
COMPOUND WORDS
If your search term is a compound word, use its hyphenated form to retrieve all variations.

Type: good-will
To retrieve: goodwill, good-will, good will

ABBREVIATIONS
If your search term is an abbreviation, type it with periods and without spaces to retrieve all variations.

Type: h.i.v.
To retrieve: H.I.V., H. I. V., HIV, H I V

COMMON WORDS
These common words are not searched unless they are included in a phrase. Search for a phrase by placing it in quotation marks.

About Deal Proof

Use the Deal Proof tool to analyze and review document drafts. You can quickly generate or review a first draft, as well as find and address potential errors, omissions, and inconsistencies that may occur in the process of drafting, negotiating, and reviewing your agreement. Deal Proof flags your document for potential errors and discrepancies, and references made in your document. After thoroughly reviewing your document, you can generate reports for flags, references, and the outline of the findings and then remove all markings and hypertext links in the documents.

Working with Deal Proof Settings

Deal Proof allows you to customize your analysis, display, and flag settings.

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click Deal Proof on the Drafting Assistant toolbar.

2. On the Deal Proof tool, click the settings button ( ) at the bottom of the viewer.

ANALYSIS SETTINGS

To select regional and formatting settings to be used during analysis, click Analysis Settings. The default settings are based on legal terminology and formatting that are typical for the location selected during installation. You can change the settings to reflect legal terminology and formatting for the United States, United Kingdom, Canada, Australia, and New Zealand, as needed.

1. Select a location to use the legal language styles of that region. During analysis, Deal Proof uses terminology typical of the region to help in identifying elements in your document. For example, a lawyer in the U.S. would typically use "Defined Terms" or "Definitions" to introduce the section of a document that lays out what the parties intend certain words to mean within the document. A lawyer in the U.K. would typically use "Interpretations."

2. To identify defined terms and other flag types within tables, select Identify Defined Terms in Tables. In the United Kingdom, it is common practice to place defined terms in tabular format, in which case you would want to select this setting. In the United States, tabular format is usually reserved for data that is not defined terms, in which case you would want to clear this setting.
3. To identify defined terms based on text treatment (bold, italic, or underlining) and enclosure within parentheses, select **Identify Bold, Italic or Underlined Defined Terms in Parentheses**. If this setting is selected, Deal Proof identifies these elements as potential defined terms.

4. Select **Prompt to incorporate Cross Referenced Documents in Defined Term analysis**, if desired.

5. Select **Enable Deal Proof Comments**, if desired.

6. Select to **Run Deal Proof analysis on original and redline version of documents**, if desired.

7. To automatically update Flags in the Result List as the document is edited, select **Update Result List Flags in Real-time**.

8. Click **Reset Defaults** to return the settings to their defaults.

9. Click **Save** to apply changes.

10. Click **Close**.

**DISPLAY OPTIONS**

To change the display options and modify the text color in the document to easily identify issues and references, click the **Display Options** tab. Use the **Text Color** list for each of the Flags and References and select a color. Click **Reset Defaults** to return the settings to their defaults. Click **Save** to apply changes.
DO NOT FLAG LIST
To customize reports and results by not flagging certain terms, click Do Not Flag List. You can create a list of terms that you do not want to flag in the current document and terms you do not want to flag in all documents.

1. Type a term in the Term (not case-sensitive) box and click Add. The term displays in the Do Not Flag (in this document) list.
2. Use the Move buttons to move terms between the Do Not Flag (in this document) and the Do Not Flag (in all documents) lists.
3. Select the terms that you do not want to flag in the lists.
4. To remove a term, select the term and click Remove Selected.
5. Click Reset Defaults to remove all terms from both lists.
6. Click Save to apply changes.
7. Click Close.

SUPPRESS FLAGS
To customize reports and results by suppressing flags, click Suppress Flags. Clear the check boxes next to the type of flags you would like to suppress. Suppressing a flag does not eliminate color mark-up of the flag, but suppresses the flag from appearing in the Results list. Click Save to apply changes. Click Reset Defaults to revert to the default and include all flags in the analysis list. Click Close to finish.

Any changes you make are not reflected in the current analysis. To view changes, you must re-analyze the document or enable the Update Result List Flags in Real-time setting.
Working with Deal Proof

Locate errors and inconsistencies in your document, analyze references, and generate reports using the Deal Proof tool.

ANALYZING A DOCUMENT

These items are checked when a document is analyzed:

- Terms that appear to require definitions have been defined.
- Defined terms are located in the document and defined only once.
- Defined terms are located as stated in the document.
- Entries in the definition section are alphabetized.
- Punctuation is properly paired.
- Similar phrases and expressions are stated with consistency.
- Numeration is correct at all levels in the document.
- Open issues in the document have been addressed.
- Date errors that may need to be corrected.
- Internal cross-references that are invalid or not bookmarked.
- Inconsistencies between the Key Parties identified versus those that appear in the signature block of the document.

You can locate errors and inconsistencies in your document. Further, if your main document contains references to other documents, the referenced documents can be analyzed as well. For example, if your main document uses a term that is defined in a separate document, the software can verify that the term is defined in that document. When analyzing a document, no changes are made to the content of your document.

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click Deal Proof on the Drafting Assistant toolbar.
2. Click Analyze.

3. If references to other documents are detected, a list of references displays. For each referenced document you want to include in the analysis, click Browse, locate the file, and click Open.
4. When you are finished linking files to referenced documents, click OK to continue analysis. Your draft document and the selected referenced documents are analyzed.
5. All potential errors and inconsistencies and references display in the left pane.
6. Expand/collapse the lists of flags and references found in the document and click the Flag and Reference types to go to the flag or reference link.
7. Click the flag or reference link to go to the flag or reference in the document text.

8. For more information on the types of flags and references listed, see "Understanding Flags" on page 34 and "Understanding References" on page 33.
9. If Update Result List Flags in Real-time has been enabled (see "Working with Deal Proof Settings" on page 27 for more information), the results list will refresh each time a change is made to the document.
10. Click Create Report to generate a report of the analysis. For more information, see "Creating Reports" on page 32.
11. Click Export and select Download to open the results in a separate document. Select Email to send the results as a Microsoft Outlook attachment. Click Deliver Report.
12. Click **Close** to remove all markings inserted in your document and close the Results pane. Cleaning a document does not remove any of the substantive changes you make to the content of the document during the analyzing process. After cleaning a document, you can forward it to others, with no evidence of analysis.

**UPDATING CROSS-REFERENCES FIELDS**

If you use Word bookmarks to link internal cross-references, fields need to be refreshed or updated to capture current paragraph numbers and correctly identify invalid cross-references. The update that will occur when you analyze a document in Deal Proof is as if you performed the same operation directly through Word. After analysis and review through Deal Proof, save the document to retain those updated fields.

**HIGH RISK INDICATORS**

Within Deal Proof analysis results, you may see the High Risk Indicator icon (⚠️). This icon identifies potentially high-risk errors in the document may lead to ambiguity or confusion, and potentially litigation. If you are pressed for time when reviewing the document, you can focus your attention on these errors.

Once the errors are corrected or dismissed, the icon will disappear.

**CREATING REPORTS**

After analyzing a document (see "Analyzing a Document" on page 30 for more information), you can generate reports for flags, references, and an outline.

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click **Deal Proof** on the Drafting Assistant toolbar.
2. Click **Create Report**.
3. Select **By Section** or **By Type** to indicate the flag report organization.
4. Select **Download** or **Email** from the delivery options. Select a format from the **Format** list.
5. Select any or all of the **Flags** and **References** you want to include in your report.
6. Select the **Outline** check box to create a report that shows an outline of key sections in your document.
7. Click **Generate Report**.
To customize reports and results by suppressing certain flags, see "Working with Deal Proof Settings" on page 27.

**Understanding References**

After analyzing your document, all references in the document are marked in the document and listed in the results pane. For more information on analyzing a document, see "Working with Deal Proof" on page 30. The following types of references are marked:
DEFINED TERMS
Terms that have been defined in your document are marked.

CONFORMING PHRASES
For each main phrase, the instances of that phrase in your document are marked. Expressions in your document do not need to be identical to be considered conforming phrases. For example, consider the phrase have been exercised. The following conforming phrases would display:

- deemed to have been exercised and such
- deemed to have been exercised immediately
- warrants have been exercised

DATES
Dates identified in the document organized by Past, Future and Ambiguous. For more information, see Date Errors in "Understanding Flags" on page 34.

CROSS-REFERENCED SECTIONS
Sections of your document that cross-reference other sections in your document are marked.

CROSS-REFERENCED DOCUMENTS
Names of cross-referenced documents are marked.

KEY PARTIES
List of parties to the contract from the cover page and/or the introductory sections of the document. For more information, see Signature Block Inconsistencies in "Understanding Flags" on page 34.

CITED SOURCES
Sources such as law, cases, and secondary sources that are cited in your document are marked.

Understanding Flags
After analyzing your document, all potential errors and inconsistencies display in the results pane. For more information on analyzing a document, see "Working with Deal Proof" on page 30.
DEFINED TERM DISCREPANCIES

These flags show potential issues and inconsistencies in defined terms, including the following:

- **Defined But Not Capitalized:** A term is defined but not capitalized.
- **Defined But Not Used:** A term is defined but not used in the document.
- **Defined More Than Once:** A term is defined more than once in the document.
- **Defined Term Location Misstated:** A term is defined in the main document but references to the term incorrectly state the location of the definition.
- **Out of Alphabetical Order:** A term in the definition section appears to be out of alphabetical order.
- **Undefined:** A term is used with initial caps in the middle of a sentence but is not defined in the document. That is, the term appears to require a definition but is not covered in the definitions section of the document.

NUMERATION DISCREPANCIES

These flags help ensure that you use consistent numbering throughout your document. Deal Proof also flags numbers that are out of sequential order.

UNPAIRED PUNCTUATION

These flags help locate any unpaired punctuation in the document, including unpaired brackets, parentheses, and quotation marks. For example, unpaired punctuation might include using an opening parentheses or bracket but not the closing parentheses or bracket, or using an opening quotation mark but not a closing quotation mark.

NON-CONFORMING PHRASES

These flags help you focus on any inconsistent language in the document. Deal Proof finds the conforming phrases in the document and checks to see that similar phrases and expressions are used consistently throughout the document.

For example, suppose it is important that your document always use the expression “similar foreign, federal, state, or local statute.” In one instance, however, you use “foreign or federal” instead. Deal Proof flags the latter instance as a non-conforming phrase.

DATE ERRORS

Flagged items will help identify dates that may need to be updated or corrected. Date Errors include incorrectly stated weekdays (Monday March 5, 2019), invalid dates (September 31), or dates that are ambiguous because they are missing a specific year or day of the month.

CROSS-REFERENCED SECTION ISSUES

Internal Cross-References can often be made inaccurate by edits and revisions made during made to the document. If the target of a bookmarked cross-reference is deleted from the document, Word will create a field code error which will be identified as an Invalid Cross-Reference.

Using Word bookmarking for internal cross-references is a helpful way to improve document navigation for the reader. Plain-text cross-references will be flagged so you can identify which references have not yet been bookmarked.

To help clarify which clause is being referenced drafters often indicate in parenthesis the title of the target clause (Clause 22 (Indemnification)). If the actual title of the referenced clause does not match what is provided, the item will be flagged.

OPEN ISSUES

These flags show any blank spaces, multiple question marks, and dates or information that need to be finalized before the document is ready. Any open issues are flagged in brackets.

Open issues are identified as follows:

- Square/angle brackets (and the text between them).
- Bullet characters.
• Two or more consecutive uses of the letter "x", except as document numeration.
• Question marks and other characters (# * @ ! $).
• Underscores or underlined spaces (if not found in the Signature Section of a document).
• Words or phrases identified as incomplete, where the language is in **bold**, *italics*, or _underlined_.

**SIGNATURE BLOCK INCONSISTENCIES**

Key parties will be identified and compared to any signature blocks found in the document. Unidentified Key Parties are flagged if they are found in the signature block but have not been listed on a cover page or in the introductory paragraphs of the document. Key Parties identified in the document that do not appear in the Signature Block by name are flagged as Unrepresented Parties.

**Suppressing Flags**

To customize reports and results by suppressing certain flags, see "Working with Deal Proof Settings" on page 27.
The Locate Precedent feature in Drafting Assistant allows you to retrieve sample agreements and clauses from those agreements related to specific contract clauses in your document. Locate Precedent analyzes your contract and creates an outline so you can locate sample agreements related to clauses in your contract.

**Locate Precedent**

To create an outline of your document and locate precedent related to specific clauses, complete the following:

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) click the **Locate Precedent** tool on the left side of your document.
2. Click **Generate Document Outline**.
3. Click a clause from the document outline on the left, and click **Find Precedent** to search for precedent related to that section of content. Click the expand/collapse buttons (↑/↓) to expand/collapse the outline. The section you select is highlighted in the document text on the right.
4. You have the following options:
   - Select **Relevance**, **Date**, or **Title (A-Z)** from the list at the top of the results to sort the list of results.
   - Click **Filter** at the top of the results list, select the desired filters, and click **Apply Filters**. Click **Clear All** to remove all filters.
   - Click **Back** to return to the document outline.
5. Click a Sample Agreement in the results list to open the document in the Locate Precedent pane. You have the following options:

- **Return to List**: Return to the full results list.
- **Open**: Open the document in another instance of Microsoft Word.
- **Search**: Type a search term in the box provided and press Enter to search within the sample agreement. At least two characters must be entered to begin a search. Use the arrows to the right of the search term to navigate from search hit to search hit in the document. Click the X to the right of the search term to remove the search.
- **Table of Contents**: Return to the outline of the document.
- **Related Documents**: See documents related to the selected sample agreement.

6. Use the document and Clauses navigation at the bottom of the document to navigate to the next sample agreement or next clause, respectively.
About Cite Formatting

The Cite Formatting tool checks citations in your legal document and suggests the correct citation format. Use the Cite Formatting tool to:

- Identify legal citations (cases, statutes, court rules, regulations, constitutions, administrative decisions, and journal and law review articles) in your document.
- Suggest citations from The Bluebook: A Uniform System of Citation, the ALWD Citation Manual, or a citation style specific to a state.
- Apply correct formatting directly to your document while giving you complete control over which citation changes to make.

**Working with Profiles in Cite Formatting**

If you are a new user, it is recommended that you define presets for common use cases using the Profile options. Profiles allow you to select, save, and reuse options you use frequently. Each time you access the Cite Formatting tool, you are provided with options to select an existing profile, view/edit profile settings for a selected profile, and create a new profile.

If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see “Accessing Drafting Assistant Tools from Your Word Processor” on page 6 for more information).

**CREATING NEW CITE FORMATTING PROFILES**

1. Click the Cite Formatting tool on the left side of your document.
2. Click Create New.
3. Type a name for the new profile in the Profile Name box (e.g., Underlined Citations).
4. Select a Jurisdiction from the list.
5. Select the Rules for Citation from the list.
6. Select a set of desired Citation Styles from the list (Legal Briefs or Law Reviews).
7. Select the content categories you would like to include in your citations list.
8. Select the Formatting Preferences you wish to apply to the citations. Options include:
   - Underline appropriate citation elements.
   - Italicize appropriate citation elements.
   - Include Subsequent History.
9. Select to include Ids, Ibids, Supras, and Case Title only short forms if desired.
10. Select an option to work with Parallel Citations:
    - Allow West Cite Advisor to suggest which citations to include.
    - Include only one citation per authority cited. If you select this option, you can choose whether to Cite to the official reporter if possible or to Cite to West's National Reporter system if possible.
    - Include Citations to all available reporters.
11. Select an option to apply to Statutes.
• Use the publication validated by Drafting Assistant.
• Use the official statute publication (e.g. U.S.C.).

12. Click **Save**.

13. Utilize the new saved profile in the Cite Formatting tool by selecting it from the **Select Profile** list, then clicking **Run Cite Formatting**. For detailed information on checking citation formatting, see "Working with Cite Formatting" on page 41.

**VIEWING, EDITING, AND DELETING CITE FORMATTING PROFILE SETTINGS**

To edit the settings for a Cite Formatting profile:

1. Click the **Cite Formatting** tool on the left side of your document.
2. Select the profile you want to view or edit from the **Select Profile** list.
3. Click **Edit**. Note, the default profile can be viewed but not edited.
4. Edit the settings as desired and click **Save**. To delete the profile, click **Delete Profile** at the bottom of the left pane. Click **Continue** to confirm.

**Working with Cite Formatting**

Check citations in your legal document, view suggestions for the correct citation format, and make formatting changes using the Cite Formatting tool.

1. If you are accessing Drafting Assistant from Word, begin by clicking the **DA** toolbar button (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information).
2. If you are a new user, it is recommended that you define presets for common use cases using the **Profile** options. Profiles allow you to select, save, and reuse options you use frequently. For more information, see "Working with Profiles in Cite Formatting" on page 39. Click the **Cite Formatting** tool on the left side of your document.
3. Click **Run Cite Formatting**.

4. Each citation displays in a list in the left pane and the citations status is displayed at the top of the Cite Formatting tool. Citation formats are marked as:
   - ![Tick] Suggestion matches the document text or a suggestion has been accepted.
   - ![X] No suggestions are available.
   - ![Question Mark] Multiple suggestions available. Choose a suggestion and click **Accept**.

5. Optionally, click the **Group By** button at the top of the citations list to group citations by **Citation Status** or **All instances of a Citation**. You can also click the **Group By** button and select **Restore Default View** to return to the default view.
6. Optionally, click the **Filter** button at the top of the citations list to filter by content type, citation format, and citation type. Select the options you wish to view, then click **Apply**.
7. Optionally, click the **Collapse/Expand All Suggestions** button to display or hide all of the suggestions for each citation.
8. Citations with formatting suggestions offer options for formatting. Select an option and click **Accept**. The status of the citation formatting displayed at the top of the Cite Formatting tool updates.
9. Optionally, you can revert to the original citation formatting after accepting a suggestion by clicking **Revert to original citation**.

10. Once you complete formatting your citations, click **Finish** to exit the tool.
About Validate Document Formatting

Once you finish drafting your document, you can use the Document Formatting tool to check whether the document is formatted in accordance with your jurisdiction's court rules. The Document Formatting tool is only available in Drafting Assistant Litigation. Drafting Assistant uses the following categories of rules to help you validate the document's format:

- **Correctable rules**: Relate specifically to your document and Drafting Assistant can correct them for you, for example, incorrect margins, fonts, and line spacing.
- **Detectable rules**: Relate specifically to your document but Drafting Assistant cannot correct them for you, for example, the document is over the page limit.
- **Informational rules**: Relate only to the type of document you are validating and provide additional information you may need prior to filing, for example, a blue cover is required.

Validate the format of a document by doing the following:

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information) and click the DA toolbar button. Click the Validate Doc Formatting tool on the left side of your document.
2. Select the appropriate court from the Court lists. Optionally, click See Map to view a map, and then click a state, click the appropriate court in the list, and click OK.
3. Select a document type from the Document Type list.
4. Select the Save document before continuing check box to save your original document as the Document Formatting tool will change that document.
5. Click OK. The first correctable rule, for example, Invalid font, is listed.
6. Do one of the following:
   - To ignore the first instance of the rule and move to the next instance of the rule, click Ignore Once.
   - To ignore all instances of the rule and move to the next rule, click Ignore Rule.
   - To change the first instance of the rule and move to the next instance of the rule, select an option under Suggestions and click Change.
   - To change all instances of the rule and move to the next rule, click This point forward in the Change All Applies Change list. Then, click an option under Suggestions and click Change All.
7. Repeat step 6 for each correctable rule.
8. To sign on to Westlaw and access KeyRules, click KeyRules.
9. To recheck the document, click Recheck Document.
10. After you finish checking the formatting of the document, a list of detectable and informational rules displays, if available. To print the list of detectable and informational rules, click **Print**.

11. Click the red **X** to close.
The Locate Authority feature in Drafting Assistant allows you to quickly find authority for language in your draft document. Locate Authority marks the text in the draft document and searches Westlaw for cases that best fit the text. From the result list, you can easily insert the citation into your draft document. Additionally, you can see how others have cited that case.

If you have a subscription to Westlaw, your search for authority is automatically run in Westlaw.

**Locate Authority**

To locate authority with Westlaw, complete the following:

1. Open your document in Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information), click the DA button on the Drafting Assistant toolbar, and then click the Locate Authority on the left side of your document.
2. Select the text in the draft document for which you want to locate authority.
3. Click Mark in the Locate Authority category. A mark is placed at the beginning and at the end of the selected text and the text displays under Pending Authority Items in the left pane. You can mark more than 4,000 text selections in a document.
4. By default, all jurisdictions for supporting authority are searched. To restrict the search to specific jurisdictions, click Edit Jurisdiction in the left pane. If you do not want to restrict the search by jurisdiction, skip to step 10.

5. In the State list, click a different state, if desired.
6. Select the Include related federal content for selected item check box, if desired.
7. In the Federal list, click a federal jurisdiction, if desired.
8. Click Save. The jurisdictions display next to Edit Jurisdiction in the left pane.
9. Click **Edit Date Range**, if desired. Click the calendar icon to select a date or type a date in the appropriate box, and then click **Save**.

10. Under Pending Authority Items, select the text for which you want to locate the authority, and then click **Search**.

   If you did not restrict the search by jurisdiction or by date, you will be prompted to sign on to Westlaw before the result list displays. To remove a selected text item under Pending Authority Items, select the text and click **Remove**. To remove all selected text under Pending Authority Items, click **Remove All**.

11. Select the check box next to the case with the citation you want to insert in the document and click **Insert Authority** at the top of the viewer. After you insert the citation, the marks are removed from the text and a check box displays next to the language in the left pane. Click **See how others have cited the case**, if available, to view how other cases have cited your case.

12. Optionally, select the check box to **Include a pinpoint cite to the relevant page(s)** to include a pinpoint cite when inserting the authority into the document.
13. Select up to three cases with the citations you want to insert.
14. Click a case name link to navigate to the language shown for the case in the result list.
15. If you selected to Include a pinpoint cite to the relevant page(s), you can highlight language in the case in order to Set as pinpoint location to choose a new pinpoint page location for purposes of inserting authority, Insert selected text with authority, or Insert authority only to include the pinpoint location of the text you selected when inserting authority.
About TOA Builder

Use the TOA Builder tool to build a properly formatted list of references (known as a Table of Authorities or TOA) in your legal document. The TOA is inserted where your cursor is positioned in the document at the time you run the tool and includes section headings for all content categories that are enabled when the profile settings are configured (see "Working with Profiles in TOA Builder" on page 48 for more information). It is considered best practice to use the TOA Builder tool in tandem with the Cite Formatting tool. Using both of these tools ensures that only valid citations are included in the table of authorities, and that those included are formatted correctly.

TOA Builder is integrated into Microsoft Word (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information).

Working with Profiles in TOA Builder

If you are a new user, it is recommended that you define presets for common use cases using the Profile options. Profiles allow you to select, save, and reuse options you use frequently. Each time you access the TOA Builder tool, you are provided with options to select an existing profile, view/edit profile settings for a selected profile, and create a new profile.

If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information).

CREATING NEW TOA BUILDER PROFILES

1. Click the TOA Builder tool on the left side of your document.
2. Click Create New.
3. Type a name for the new profile in the Profile Name box (e.g. Combined Federal and State).
4. Select a Jurisdiction from the list.
5. Select the content categories you would like to include in your citations list.
6. Select the Formatting preferences you wish to apply to the headings in the TOA. Options include font type, size, and style (Bold, Italic, Underline).
   - You can also select the check box to Add Page(s) label above page numbers.
7. Select an option to work with Citations in TOA:
   - Match font and font size from citation in the document.
   - Apply Special Formatting. If you select this option, you can choose a font type and size to apply to the citations.
8. Select an Underline and Italicize option for the citations in the TOA:
   - Use underlining and italics that are applied to the cites in the text of the document
   - Apply Special Formatting. If you select this option, you can choose to Underline Title, Italicize Title, or both.
9. Select one or more of the following options:
   - **Case name on separate line**: Print each case name on a separate line.
   - **Include subsequent history from text**: Include history in citations in the table of authorities.
   - **Use Passim for Frequently Cited Sources**: Use passim rather than citing specific pages.
   - **Combine Federal and State categories**: Combine federal and state citations in each table of authorities category. For example, if this option is selected, federal and state citations are listed together under Cases. If this option is not selected, cases are listed under Federal Cases and State Cases separately.
   - **Display comma delimiter after case title**: Add or remove the comma delimiter after case titles.

10. **Select a Tab Leader** from the list provided (a tab leader is a row of dots or lines that connect the TOA text to the page number).

11. **Select a TOA Spacing** option (Single or Double) from the list provided. This setting only applies to citations in the TOA. Headings are always double-spaced.

12. Click **Save**.

13. Utilize the new saved profile in the TOA Builder tool by selecting it from the **Select Profile** list, then clicking **Run TOA Builder**. For detailed information on inserting a TOA into your document, see "Working with TOA Builder" on page 50.
VIEWING, EDITING, AND DELETING TOA BUILDER PROFILE SETTINGS

1. Click the TOA Builder tool on the left side of your document.
2. Select the Profile you want to view or edit from the Select Profile list.
3. Click Edit. The default profile can be viewed but not edited.
4. Edit the settings as desired and click Save. To delete the profile, click Delete Profile at the bottom of the left pane. Click Continue to confirm.

Working with TOA Builder

The Table of Authorities (TOA) Builder inserts a properly formatted list of references in your legal document.

BUILDING A TABLE OF AUTHORITIES

1. Click the TOA Builder tool on the left side of your document. If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information).
2. If you are a new user, it is recommended that you define presets for common use cases using the Profile options. Profiles allow you to select, save, and reuse options you use frequently. See "Working with Profiles in TOA Builder" on page 48 for more information.
3. Under Cite Identification Range, complete one of the following:
   - Select Search entire document for cite identification to search the entire document for cite identification.
   - Select Mark beginning and end range for cite identification to restrict the search to only part of the document. Place the cursor in the document at the beginning of the desired range and click the Set start position button. Place the cursor at the end of the desired range and click the Set end position button. You can also change the range by clicking either the Update start position or Update end position buttons.
4. Click Run TOA Builder. All authorities found in the document will display in the left pane.

5. Optionally, click the Hide/Show All Instances button to display or hide additional instances of citations.

6. To quickly locate a citation in your document, select it from the citations list in the left pane. The document view scrolls to the location of the citation and the citation is highlighted in your document.

7. Select individual check boxes, content category check boxes, or the Select All check box to select the citations you want to include in the TOA.
8. Click the **Plus** button to manually add a citation. Then, complete the following:
   
   - **Choose category**: Select the citation category and jurisdiction for the citation. Click **Next**.
   
   ![Image of the TOA Builder Add Citation interface]

   - **Input citation text**: Enter the **Title** and **Reporter String** in the appropriate fields. Confirm the citation is correct in the Preview window and then click **Next**.

   ![Image of the TOA Builder Add Citation interface with a case example]

   - **Add citation**: Highlight the full citation in the document and then click **Add**. The citation will be added to the list.
     
     **Note** You can also highlight the citation in your document before you click the **Plus** icon. Appropriate fields will be autopopulated based on your highlights and you can edit as appropriate.
     
     **Note** After you add a manual citation to the list, the list will re-alphabetize itself. If you plan to relocate a citation out of alphabetical order, be sure to add all necessary manual citations before you manually move citations to the desired locations.
9. When selecting a citation in the list, you have the following options:

- Click the **Edit Text** button to edit the citation. Edit the title or reporter string as appropriate, confirm the citation is correct in the Preview, and click **Save**.

- Click the **Move Up** or **Move Down** button to move it up or down in the list. You can also drag and drop citations to any other part of the list.

- Click the **Make Primary** button to change a secondary citation into a primary one in the list. Click the **Make Secondary** or **Make Instance** button to change the citation to a secondary citation of the citation immediately above it in the list.

- Click the **Edit Range** button to change the range of the cite in the document. Select to change the **Title** or **Reporter** as appropriate, highlight the complete title or reporter string in the document, confirm its correctness in the Preview, click the **Update** button, and then click **Save**.
10. Click Insert TOA.
11. Click in the document to select a position in the document to insert your TOA, then click Submit.
12. Verify the TOA is in the correct position. Click Change Position, if needed. Click Finish.

13. A message verifying the TOA has been inserted displays. Click X to close.

The table of authorities is inserted in your document at the cursor location. The table of authorities includes the following headings, dependent on the selected Profile settings: Cases, Federal Cases, State Cases, Statutes, Federal Statutes, State Statutes, Rules, Federal Rules, State Rules, Regulations, Federal Regulations, State Regulations, and Other Authorities.

EDITING CITATIONS AND ADDING ADDITIONAL CITATIONS AFTER THE TOA HAS BEEN CREATED

After you insert the Table or Authorities into your document, you can add additional citations or edit additional citations within both the text of the document and the Table of Authorities without undoing your previous work. Before you begin, add or edit any citations as appropriate.

1. Click the TOA Builder tool on the left side of your document. If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see “Accessing Drafting Assistant Tools from Your Word Processor” on page 6 for more information).
2. Under Cite Identification Range, complete one of the following:
   - Select Search entire document for cite identification to search the entire document for cite identification.
3. Click **Run TOA Builder**.
4. Complete one of the following:
   - Select **Continue editing the existing TOA** to maintain all edits that have been previously made.
   - Select **Remove existing TOA Tags and start again** to start from scratch with the Table of Authorities.
5. Click **Continue**. The citation list will appear in the left pane.
6. If you selected to keep the previous TOA, new or edited citations will appear with a New icon next to them in the list. Drafting Assistant classifies new citations as:
   - Citations that you added to the text after the first TOA was completed.
   - Citations that were removed from the TOA the first time. If you deselected a citation previously, it will reappear in the list and be selected by default.

7. Manipulate the list of citations as described above as necessary and click **Insert TOA** to begin the process of inserting the TOA into your document once more.

   *Note* After you run the TOA Builder again or insert a manual citation, the citation list will re-alphabetize itself. If you plan to relocate a citation out of alphabetical order, be sure to add all necessary manual citations before you manually move citations to the desired locations.
About Flags & Links

The Flags & Links tool allows you to view the status of cited cases, statutes, court rules, regulations, and administrative decisions in your document. Flags and links are applied to all standard long and short form citations, but you have the option to include Ids, Supras, Ibids, or to include case titles only in short form. Use the Flags & Links tool to link to full-text documents on Westlaw.

**Working with Profiles in Flags and Links**

If you are a new user, it is recommended that you define presets for common use cases using the Profile options. Profiles allow you to select, save, and reuse options you use frequently. Each time you access the Flags & Links tool, you are provided with options to select an existing profile, view/edit profile settings for a selected profile, and create a new profile.

If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information).

**CREATING NEW FLAGS & LINKS PROFILES**

1. Click the Flags & Links tool on the side of your document.
2. Click Create New.

3. Type a name for the new profile in the Profile Name box (e.g. Secondary Source Flags).
4. Select a Jurisdiction from the list.
5. Select the content categories you would like to include.
6. Select to Include Ids, Supras, Ibids if desired.
7. Select to Include case titles only short form if desired. Note that Flags & Links will be applied to all standard long and short form citations.
8. If you would like to share a document with links to Westlaw with others who do not have access to documents on Westlaw, select Pooled Authentication. This will allow the other users access to the links on Westlaw using you as a sponsor. Otherwise, select Do Not Apply Authentication Settings.
9. Click Save.
10. Utilize the new saved profile in the Flags & Links tool by selecting it from the Select Profile list, then clicking Insert/Update. For detailed information inserting Flags & Links, see “Working with Flags and Links” on page 59.

VIEWING, EDITING, AND DELETING FLAGS & LINKS PROFILE SETTINGS

To edit the settings for a Flags & Links profile:

1. Click the Flags & Links tool on the side of your document.
2. Select the profile you want to view or edit from the Select Profile list.
3. Click Edit. Note, the default profile can be viewed but not edited.
4. Edit the settings as desired and click **Save**. To delete the profile, click **Delete Profile** at the bottom of the left pane.

**Working with Flags and Links**

Insert, update, or remove KeyCite status flags and links from the citations in your document to the full-text documents on Westlaw.

**Note** Some options may not be available in the Drafting Assistant Office Add-in application.

**INSERTING AND UPDATING FLAGS AND LINKS**

1. Click the **Flags & Links** tool on the side of your document. If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see “Accessing Drafting Assistant Tools from Your Word Processor” on page 6 for more information).
2. If you are a new user, it is recommended that you define presets for common use cases using the **Profile** options. Profiles allow you to select, save, and reuse options you use frequently. For more information, see "Working with Profiles in Flags and Links" on page 57.
3. Select to insert **Links**, **Flags**, or both, then click **Insert/Update**.

4. A list of KeyCite flags that have been added display. To quickly locate a citation in your document, select it from the list. The document view scrolls to the location of the citation and the citation is highlighted in your document. For more information, see “About KeyCite Status Flags” on page 66. This option is not available in the Drafting Assistant Office Add-in application.
5. You have the following options:
   - **Filter**: Filter the list of citations by flag type. Click the Filter button at the top of the citations list, select the flags you wish to view, then click Apply.
   - **Download**: Download, print, and send the citations list. Click the Download button at the top of the citations list, select a format from the list provided, then click Download. Once downloaded, you can open and print the downloaded citations and you can send them to others via email. This option is not available in the Drafting Assistant Office Add-in application.

6. Click Finish to return to the Drafting Assistant list of available tools. A message displays indicating the number of citations that were processed. Click X to close the message.

**REMOVING FLAGS AND LINKS**

1. Click the Flags & Links tool on the side of your document. If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information).
2. If you are a new user, it is recommended that you define presets for common use cases using the Profile options. Profiles allow you to select, save, and reuse options you use frequently. For more information, see "Working with Profiles in Flags and Links" on page 57.
3. Select to remove Links, Flags, or both, then click Remove.
4. Confirm the selection of Links, Flags, or both. Click Remove.
5. A message displays indicating the number of links and flags removed from the document. Click X to close the message.

**About KeyCite Status Flags**

KeyCite is a citation research service which helps you determine whether your case, statute, administrative decision, or federal regulation is good law and find cases and other sources that cite it. A red, yellow, or blue striped flag; blue H; or green C indicates that KeyCite information is available for the associated document. A KeyCite status flag lets you know immediately the status of a case, statute, regulation, rule, or administrative decision.
**Red Flag**

In cases and administrative decisions, a red flag warns that the case or administrative decision is no longer good law for at least one of the points of law it contains.

In statutes and regulations, a red flag warns that the statute or regulation has been amended by a recent session law or rule, repealed, superseded, or held unconstitutional or preempted in whole or in part.

**Overruling Risk Icon**

In cases, an Overruling Risk icon warns that the case relies on another case or proposition from another case that has been explicitly overruled. For example, Case A is explicitly overruled or abrogated by Case B, but Case C, which cites case A for the same proposition that was overruled is not mentioned in Case B. Case C is implicitly overruled by Case B, and thus will display the Overruling Risk warning.

**Yellow Flag**

In cases and administrative decisions, a yellow flag warns that the case or administrative decision has some negative history, but has not been reversed or overruled.

In statutes and regulations, a yellow flag warns that the statute has been renumbered or transferred by a recent session law; that an uncodified session law or proposed legislation affecting the statute is available (statutes merely referenced, i.e., mentioned, are not marked with a yellow flag); that a proposed rule affecting the regulation is available; that the regulation has been reinstated, corrected, or confirmed; that the statute or regulation was limited on constitutional or preemption grounds or its validity was otherwise called into doubt; or that a prior version of the statute or regulation received negative judicial treatment.

**Blue Striped Flag**

A blue striped flag indicates a document has been appealed to the U.S. Courts of Appeals or the U.S. Supreme Court (excluding appeals originating from agencies).

**Blue H**

In cases and administrative decisions, a blue H indicates that the case or administrative decision has some history.

**Green C**

In cases and administrative decisions, a green C indicates that the case or administrative decision has citing references but no direct history or negative citing references. In statutes and regulations, a green C indicates that the statute or regulation has citing references.

**Unverified Red U**

Citations that are unverified or that contain potential errors display with an Unverified tag next to them.

**Red M**

The red M indicates that the case title provided in the document does not match the reporter citation that Drafting Assistant has validated. The validated reporter citation will display the Westlaw flag associated with that citation, if any. The red M flag will appear immediately in front of the potentially incorrect title. Additional revisions may be needed to ensure that the title cited is correct or if the reporter citation has been entered incorrectly.
About WestCheck

WestCheck is an automated citation-checking tool that verifies the status of citations in your legal document or in a citations list you create manually. Use the WestCheck tool to:

- Check the status of your citations in KeyCite (see "Checking Citations" on page 65 for more information).
- Create a Cited Decisions list of cases cited by your case (see "Creating a Citations List" on page 67 for more information).
- Access QuoteRight to verify the accuracy of quotations in your documents (see "Verifying Quotations with QuoteRight" on page 70 for more information).
- Retrieve full-text versions of cited documents.

WestCheck is available via:

- Software integrated into Microsoft Word and Corel WordPerfect (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information).
- Online software at drafting.thomsonreuters.com.
- Microsoft Word add-in.

Services Available in WestCheck

KEYCITE

Use Thomson Reuters KeyCite® citation checking service to instantly verify whether a case, statute, regulation, or administrative decision is good law, and to find citing references to support your legal argument. KeyCite integrates with the West Key Number System so you can track legal issues discussed in a case. In addition, KeyCite provides information such as:

- Direct appellate history of cases and administrative decisions.
- Negative citing references for cases and administrative decisions.
- Citations to cases, administrative decisions, secondary sources, briefs, and other court documents that have cited a case, statute, administrative decision, or regulation.
- Citations to session laws or rules amending or repealing a statute or regulation.
- Citations to proposed legislation affecting a federal or state statute.

KeyCite covers every case in the National Reporter System, as well as more than 1 million unpublished cases. KeyCite information is also available for federal and state statutes and regulations, administrative decisions from selected states, patents issued by the U.S. Patent and Trademark Office, American Law Reports (ALR) annotations, articles from hundreds of law reviews, and administrative decisions of selected federal agencies. In addition, KeyCite provides citing references from numerous texts and treatises.

FIND

When you know the citation of the document you want, WestCheck can retrieve the full text of the document and send it to a destination you choose. The Find service is available for many types of documents, including case law, statutes, regulations, administrative decisions, articles from publications such as law reviews and treatises, specialized materials (for example, OSHA inspection and enforcement reports), and materials published in foreign countries.

CITED DECISIONS

While KeyCite lists cases citing your case, the Cited Decisions service lists the cases cited by your case. Cited Decisions gives you an idea of whether the precedential value of the case you are citing has been eroded. Cited Decisions is also available for ALR annotations, law review articles, and selected administrative decisions.

Cited Decisions is a useful tool for finding hidden weaknesses in a case because it shows whether the cases on which your case relies have significant negative history. The Cited Decisions result allows you to determine at a glance which cited cases merit investigation.
• Cited cases are marked with KeyCite status flags, which indicate whether the cases have history or citing references available in KeyCite.
• Each cited case is marked with depth of treatment stars that indicate the extent to which the citing case discusses the cited case.
• Quotation marks indicate when a citing case directly quotes the cited case.

QUOTERIGHT
Use QuoteRight to verify the accuracy of quotations cited in your document. When WestCheck extracts citations from your document, it also creates a list of quotations found in your document. You can choose to have the QuoteRight service check these quotations against the full text of the documents.

Working with Profiles in WestCheck
If you are a new user, it is recommended that you define presets for common use cases using the Profile options. Profiles allow you to select, save, and reuse options you use frequently. Each time you access the WestCheck tool, you are provided with options to select an existing profile, view/edit profile settings for a selected profile, and create a new profile.

If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see “Accessing Drafting Assistant Tools from Your Word Processor” on page 6 for more information).

CREATING NEW WESTCHECK PROFILES
1. Click the WestCheck tool on the side of your document.
2. Click Create New.
3. Type a name for the new profile in the Profile Name box (e.g. KeyCite History).
4. Select a Jurisdiction from the list.
5. Select the content categories you would like to include in your citations list.
6. When the WestCheck tool extracts citations from your document, it also creates a list of quotations found in your document. When a quotation is attached to a citation, the WestCheck tool compares the quotation in the user’s document against the actual quotation in the cited document. QuoteRight displays the quotation text from both the user’s document and the cited document, noting if the quotation is identical or different. You can also choose to ignore quotes that contain less than two to six words. The WestCheck tool extracts the citation but QuoteRight does not attach quotations with less than the specified number of words to the citations (e.g., select 2 to indicate that QuoteRight should not process quotations of less than two words). Turn this feature off by selecting Turn off QuoteRight.
7. Select the services (KeyCite, Find, QuoteRight, and Cited Decisions) to use to check your citations. To set KeyCite limits, click the Select Limits link under the KeyCite option (see “Setting KeyCite Limits” on page 72 for more information).
8. Select to sort the WestCheck citation list report by Citation or Services (KeyCite, Find, QuoteRight, Cited Decisions).
9. Select to Include short form instances, unverified cites and cites for which no services have been requested in the WestCheck summary, if desired.
10. Click Save.
11. Utilize the new saved profile in the WestCheck tool by selecting it from the Select Profile list, then clicking Extract Citation List. For detailed information on creating a citations list, see "Creating a Citations List" on page 67.

VIEWING, EDITING, AND DELETING WESTCHECK PROFILE SETTINGS

To edit the settings for a WestCheck profile:

1. Click the WestCheck tool on the side of your document.
2. Select the profile you want to view or edit from the Select Profile list.
3. Click Edit. Note, the default profile can be viewed but not edited.
4. Edit the settings as desired and click Save. To delete the profile, click Delete Profile at the bottom of the left pane. Click Continue to confirm.

Checking Citations

You can check your citations in the WestCheck tool using the KeyCite, Find, QuoteRight, and Cited Decisions services then create an online or offline report. Note that citations that are unverified or that contain potential errors display with an unverified tag next to them. This tag remains until the citation is corrected and the new citations list is extracted or until the citation is manually added to the list.

1. Click the WestCheck tool on the side of your document. If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see “Accessing Drafting Assistant Tools from Your Word Processor” on page 6 for more information).

2. If you are a new user, it is recommended that you define presets for common use cases using the Profile options. Profiles allow you to select, save, and reuse options you use frequently. See “Working with Profiles in WestCheck” on page 63 for more information.

3. Click Extract Citation List.

4. Select the services (KeyCite, Find, Cited Decisions, QuoteRight) to use to check your citations.
   - To add/remove services for all citations, click the Add/Remove Services button ( ), select the services you would like to include/exclude, and click Apply to all citations.
• To add/remove services for individual citations, click to add/remove the services using the buttons below the citation. To set KeyCite limits, click the Limits link under the KC button (see "Setting KeyCite Limits" on page 72 for more information).

5. To generate a report of your citations, see "Working with Reports in WestCheck" on page 71.

About KeyCite Status Flags

KeyCite is a citation research service which helps you determine whether your case, statute, administrative decision, or federal regulation is good law and find cases and other sources that cite it. A red, yellow, or blue striped flag; blue H; or green C indicates that KeyCite information is available for the associated document. A KeyCite status flag lets you know immediately the status of a case, statute, regulation, rule, or administrative decision.

⚠️ Red Flag

In cases and administrative decisions, a red flag warns that the case or administrative decision is no longer good law for at least one of the points of law it contains.

In statutes and regulations, a red flag warns that the statute or regulation has been amended by a recent session law or rule, repealed, superseded, or held unconstitutional or preempted in whole or in part.

⚠️ Overruling Risk Icon

In cases, an Overruling Risk icon warns that the case relies on another case or proposition from another case that has been explicitly overruled. For example, Case A is explicitly overruled or abrogated by Case B, but Case C, which cites case A for the same proposition that was overruled is not mentioned in Case B. Case C is implicitly overruled by Case B, and thus will display the Overruling Risk warning.

⚠️ Yellow Flag

In cases and administrative decisions, a yellow flag warns that the case or administrative decision has some negative history, but has not been reversed or overruled.

In statutes and regulations, a yellow flag warns that the statute has been renumbered or transferred by a recent session law; that an uncodified session law or proposed legislation affecting the statute is available (statutes merely referenced, i.e., mentioned, are not marked with a yellow flag); that a proposed rule affecting the regulation is available; that the regulation has been reinstated, corrected, or confirmed; that the statute or regulation was limited on constitutional or preemption grounds or its validity was otherwise called into doubt; or that a prior version of the statute or regulation received negative judicial treatment.

⚠️ Blue Striped Flag

A blue striped flag indicates a document has been appealed to the U.S. Courts of Appeals or the U.S. Supreme Court (excluding appeals originating from agencies).

⚠️ Blue H

In cases and administrative decisions, a blue H indicates that the case or administrative decision has some history.

⚠️ Green C

In cases and administrative decisions, a green C indicates that the case or administrative decision has citing references but no direct history or negative citing references. In statutes and regulations, a green C indicates that the statute or regulation has citing references.
Citations that are unverified or that contain potential errors display with an Unverified tag next to them.

The red M indicates that the case title provided in the document does not match the reporter citation that Drafting Assistant has validated. The validated reporter citation will display the Westlaw flag associated with that citation, if any. The red M flag will appear immediately in front of the potentially incorrect title. Additional revisions may be needed to ensure that the title cited is correct or if the reporter citation has been entered incorrectly.

**ABOUT DEPTH OF TREATMENT CATEGORIES**

**Examined**
The citing case, administrative decision, or brief contains an extended discussion of the cited case or administrative decision, usually more than a printed page of text.

**Discussed**
The citing case, administrative decision, or brief contains a substantial discussion of the cited case or administrative decision, usually more than a paragraph but less than a printed page.

**Cited**
The citing case, administrative decision, or brief contains some discussion of the cited case or administrative decision, usually less than a paragraph.

**Mentioned**
The citing case, administrative decision, or brief contains a brief reference to the cited case or administrative decision, usually in a string citation.

**Creating a Citations List**
Extract the citations from your document and create a citations list by clicking the WestCheck tool on the left side of your document, then clicking Extract Citation List. If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see “Accessing Drafting Assistant Tools from Your Word Processor” on page 6 for more information).

**ADDING CITATIONS TO THE CITATIONS LIST**
Once you have extracted a citation list, you can manually add citations to that list.

1. Click the Add Citation button at the top of the citations list.
2. In the Citation box, type the citation.
3. In the Title box, type a title for the citation.
4. Click Add.
LOCATING A CITATION IN YOUR DOCUMENT

Locating a Citation

To quickly locate a citation in your document, select it from the citations list in the left pane. The document view scrolls to the location of the citation and the citation is highlighted in your document.

Locating Inaccurate Citations

Citations that are unverified or that contain potential errors display with an unverified tag next to them (Unverified). This mark remains until the citation is corrected and the WestCheck tool is run again or until the citation is manually added to the list.

Citations that are not available with your subscription display with a red symbol displayed next to them.
DOWNLOADING, PRINTING, AND SENDING CITATIONS

Download, print, and send the entire citations list or individual citations in the list. This option is not available in the Drafting Assistant Office Add-in application. For instruction using the Office add-in, see "Downloading, Printing, and Sending Citations with the Office add-in" on page 69.

1. Click the check box next to the citations you want to download. If you want to download all of the citations, click the Select All check box.
2. Click the Download button at the top of the citations list.
3. Select a format from the list, then click Download.

Once downloaded, you can open and print the downloaded citations and you can send them to others via email.

DOWNLOADING, PRINTING, AND SENDING CITATIONS WITH THE OFFICE ADD-IN

To download, print, and send the entire citations list or individual citations in the list using the Drafting Assistant Office add-in, complete the following:

1. Click the check box next to the citations you want to download in the WestCheck report (see "Working with Reports in WestCheck" on page 71 for more information). If you want to download all of the citations, click the Select All check box.
2. Complete the required fields, and click Generate Report.

Once the email has be received, you can open and print the downloaded citations and you can send them to other via email.
Verifying Quotations with QuoteRight

Use QuoteRight to verify the accuracy of statutory or case law quotations cited in your document. When the WestCheck tool extracts citations from your document, it also creates a list of quotations found in your document.

If a citation is linked to a quotation, the number of available quotations for the citation is listed after the citation in your citations list. WestCheck also creates a list of quotations found in your document. You can view the extracted quotations for the entire list or you can view the extracted quotations by individual citations.

When a quotation is attached to a citation, WestCheck compares the quotation in the user’s document against the actual quotation. QuoteRight displays the quotation text from both the user’s document and the cited document, noting if the quotation is identical or different.

VIEWING QUOTATIONS BY INDIVIDUAL CITATION:

You must enable the QuoteRight service in the WestCheck profile that you use when extracting your citation list. When QuoteRight is enabled and citations are extracted, an Attach Quotes button displays at the top of the WestCheck citations list. For more information, see “Working with Profiles in WestCheck” on page 63.

1. Click the Attach Quotes button located at the top of the WestCheck citations list.
2. Select a quote from the list of quotes.
3. Detach a quotation from a citation by dragging the quotation to the Unattached Quotes area at the bottom of the quotes list.
4. Attach a quotation from Unattached Quotes at the bottom of the quotes list by dragging it to the citation you want to attach it to.
5. Optionally, select a quotation and click the Move Up or Move Down button to move it up or down in the list.

To quickly locate a quotation in your document, select it from the quotes list in the left pane. The document view will scroll to the location of the quote and the quote will be highlighted in your document.
Working with Reports in WestCheck

1. Once you have checked your citations in WestCheck (see “Checking Citations” on page 65 for more information), click Create Report.

2. Select the Report Settings:
   - **Delivery Options:**
     - The Email option provides boxes for To, Subject, Email Note, and a Format list that allows you to choose to deliver the report in Word, PDF, or RTF format. You can deliver the report to multiple email addresses.
     - The Download option allows you to choose to download the report in Word, PDF, or RTF format. This option is not available in the Drafting Assistant Office Add-in application.
     - The Online Report Display option allows you to view the report in your browser and includes links to the full-text documents on Westlaw, links to the KeyCite history and citing references, and a navigational index. This option is not available in the Drafting Assistant Office Add-in application.
   - **Result Options:**
     - Select Deliver Find results separately from the report and select Word, PDF, or RTF format to deliver all Find requests in a separate document in that format. If you select this option, you may also want to select Create one file for all Find Results to deliver the Find requests separately and as one single document (instead of multiple documents).
     - Select Substitute with Reporter Images when available to deliver PDF images of case law documents exactly as they appear in the National Reporter System. If you select this option, you may also want to select Create one PDF for all Reporter Images to deliver the results as a single PDF (instead of multiple PDFs).
     - Select Dual Column Layout for Cases to format the results in two columns per page. This option is not available for the Online Report Display.
   - **Report Options:**
     - Select KeyCite Flags in Find Results for Cases to display KeyCite flags and information in the Find Results (see below for example).

- **Citation Options:**
  - If you have access to Cite Formatting through a Drafting Assistant subscription, you have an additional option to view your citations within the WestCheck report in a particular rule format. This option is not available in the Drafting Assistant Office Add-in application.
  - Select the Rules for Citation you prefer from the list. This option is not available in the Drafting Assistant Office Add-in application.
  - By default the rule format is Westlaw which provides all of the citation details that may not be included in the citation formatting rules. For example, Westlaw format includes all possible parallel citations, the specific date of a case decision, and the docket number for the case. This option is not available in the Drafting Assistant Office Add-in application.
3. Click Generate Report.

ABOUT WESTCHECK REPORTS

Reports generated using the WestCheck tool consist of a header, summary report, table of citations with services requested for each, detailed services reports, and a billing summary. Reports include linked KeyCite status flags (see "About KeyCite Status Flags" on page 66 for more information) and depth-of-treatment indicators (see "About Depth of Treatment Categories" on page 67 for more information) for cited documents so that you know at a glance whether your authority is good law.

The online report includes the KeyCite status flags, links to the full-text documents on Westlaw, links to the KeyCite history and citing references, and a navigational index.

Setting KeyCite Limits

Use KeyCite Limits in the WestCheck tool to restrict your KeyCite results for cases and statutes. Limiting your results is helpful if you are interested only in specific categories of KeyCite information.

You can set KeyCite Limits to apply to all citations by setting and saving the Limits in WestCheck profiles (see "Working with Profiles in WestCheck" on page 63 for more information). You can also set KeyCite Limits for individual citations using the Limits link under the KC button once you extract a citation list (see "Creating a Citations List" on page 67 for more information).
KEYCITE LIMITS

Limits for Date, Content Type, Depth of Treatment and other filters are only applied to positive Citing References included in your WestCheck report. Full Negative Treatment will always be provided.

Cases:
- Select Include Citing References to retrieve citing references for cases.
  - Click Narrow by Content Type and Other Filters to further restrict citing references from displaying. Clicking this link provides options to filter citing references by Content Types, Depth of Treatment (see "About Depth of Treatment Categories" on page 67), Jurisdictions, Reported Status, and Date Range.
  - If you select Include Citing References, you may also want to select Limit Citing References to Negative Treatment to retrieve only negative treatment citing references for the case. Narrow by Content Type and Other Filters will not apply to Negative Treatment.
- Select Include History References to retrieve KeyCite history for cases. If you select this option, you may also want to select Limit History to Negative Treatment to retrieve only the negative treatment history for the case. If you select to limit the history, you can further select to Exclude Filings to retrieve negative history for the case but not include citations for related court documents.

Statutes:
- Select Include Citing References to retrieve citing references for statutes.
  - Click Narrow by Content Type and Other Filters to further restrict citing references from displaying. Clicking this link provides options to filter citing references by Content Types, Depth of Treatment (see "About Depth of Treatment Categories" on page 67), Jurisdictions, Reported Status, and Date Range.
- Select Include History References to retrieve statutory history, including proposed legislation, credits, and statutory and historical notes. If you select this option, you may also want to select Limit to Validity References to retrieve history for the statute but limit it to validity references.
Analytical & Law Reviews:

- Select Include Citing References to retrieve citing references for analytical and law reviews.
  - Click Narrow by Content Type and Other Filters to further restrict citing references from displaying. Clicking this link provides options to filter citing references by Content Types, Depth of Treatment (see “About Depth of Treatment Categories” on page 67), Jurisdictions, Reported Status, and Date Range.

Patents:

- Select Include Citing References to retrieve citing references for patents.
  - Click Narrow by Content Type and Other Filters to further restrict citing references from displaying. Clicking this link provides options to filter citing references by Content Types, Depth of Treatment (see “About Depth of Treatment Categories” on page 67), Jurisdictions, Reported Status, and Date Range.
  - If you select Include Citing References, you may also want to select Limit Citing References to Negative Treatment to retrieve only negative treatment citing references for the patent. Narrow by Content Type and Other Filters will not apply to Negative Treatment.

- Select Include History References to retrieve KeyCite history for patents. If you select this option, you may also want to select Limit History to Negative Treatment to retrieve only the negative treatment history for the patents. If you select to limit the history, you can further select to Exclude Filings to retrieve negative history for the patents but not include citations for related court documents.
About Authority Compiler

Authority Compiler automatically creates a copy of your document, such as a brief, and appends to it all the important legal sources referenced in the document. The referenced documents are retrieved from Westlaw and a package (for example, Microsoft Word or PDF) is created containing your document and the cited legal sources. Hyperlinks are inserted into the document and jump to the appended authorities, without requiring the reader to access an online source.

You can use this self-contained copy of your document to file with the court, deliver to the court as a courtesy copy; or share with clients, co-counsel, and co-defendants.

Authority Compiler is only available in Drafting Assistant Litigation.

Working with Profiles in Authority Compiler

If you are a new user, it is recommended that you define presets for common use cases using the Profile options. Profiles allow you to select, save, and reuse options you use frequently. Each time you access the Authority Compiler tool, you are provided with options to select an existing profile, view/edit profile settings for a selected profile, and create a new profile.

If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information).

Profiles in Authority Compiler save the options you want when you compile authority, such as jurisdictional settings, the scope of coverage, and other preferences for the appended authority.

CREATING NEW AUTHORITY COMPILER PROFILES

1. Click the Authority Compiler tool on the left side of your document to launch Authority Compiler.
2. Click Create New Profile.
3. Type a name for the new profile in the Profile Name box.
4. Select a Jurisdiction from the list to designate a jurisdiction to aid in identifying citations. Citations that are recognized are listed on the Select Authority window and can be appended as an authority. To remove a jurisdiction from the appended authorities, select a jurisdiction from the list and select Don't append authorities from this jurisdiction. Citations from this jurisdiction will not be selected on the Select Authority window.
5. Select the **Content Categories** to indicate the types of legal authority to include. Authorities within scope are listed and can be appended as an authority. Options include:
   - Cases
   - Statutes
   - Regulations
   - Court Rules and Orders
   - Administrative Reports and Decisions
   - Secondary Sources

6. Select the **Append Authority Preferences**:
   - **Link Citations to appended authority**: Inserts hyperlinks for citation that go to the appended authorities. The links change color after processing according to Microsoft Word settings, but underlining, italics, and other styling is preserved.
   - **Deselect Out of Plan authorities**: If the citations in your document are not covered in your Westlaw subscription, the corresponding legal documents are not marked for inclusion in the appended documents. Out-of-plan authorities are labeled. If you opt to include these citations as authorities, additional charges may apply.
   - **Include separator pages**: Inserts a separator page between appended documents.
   - **Insert a Table of Contents**: Inserts a table of contents for appended documents that appear after your document and before the appended documents. The document names are hyperlinks that go to the first page of the appended legal document.
   - **Use the annotated version of a statute when available**: The annotated version of a statute appears in the appended documents, if available.

7. If you want appended documents to include page numbers, select **Add Page Numbers**. Then select to **Number separately from drafted document** or **Continue numbering from drafted document**.

8. Click **Save Profile**. Utilize the new saved profile in the Authority Compiler tool by selecting it from the **Profile Settings** list.

**EDITING, AND DELETING AUTHORITY COMPILER PROFILE SETTINGS**

To edit the settings for an authority compiler profile:

1. Click the **Authority Compiler** tool on the left side of your document.
2. Select the profile you want to view or edit from the **Profile Settings** list.
3. Click **Edit** to edit the profile settings. The default profile cannot be edited.
4. Edit the settings as desired and click **Save**.
To delete an authority compiler profile:

1. Click the Authority Compiler tool on the left side of your document.
2. Select the profile you want to view or edit from the Profile Settings list, and click Edit.
3. Click Delete Profile, and click Continue to verify.

**Working with Authority Compiler**

Authority Compiler automatically creates a copy of your document, such as a brief, and appends to it all the important legal sources referenced in the document. The referenced documents are retrieved from Westlaw and a package (e.g., Microsoft Word or PDF) is created containing your document and the cited legal sources. Hyperlinks are inserted into the document and jump to the appended authorities, without requiring the reader to access an online source.

You can use this self-contained copy of your document to file with the court, deliver to the court as a courtesy copy, or share with clients, co-counsel, and co-defendants.

To access Authority Compiler:

1. Click the Authority Compiler tool on the left side of your document. If you are accessing Drafting Assistant from Word, begin by clicking the DA toolbar button (see “Accessing Drafting Assistant Tools from Your Word Processor” on page 6 for more information).
2. If you are a new user, it is recommended that you define presets for common use cases using the Profile options. Profiles allow you to select, save, and reuse options you use frequently. For more information, see “Working with Profiles in Authority Compiler” on page 75.
3. Select the profile you want to use from the Profile Settings list.
4. Select the delivery format that you want for your compiled authority from the Export Settings list (for example, Word Document, PDF).
5. Click Browse and select the document for which you want to compile authority. You can upload .doc, .docx, .rtf, or .txt files. For best performance, upload a document on your local computer, not from a network.

   If you already have a document open in Microsoft Word, you still must select a document to upload. The document you upload cannot already be open.

6. Click Begin Authority Compiler.
All authorities found in your document according to your profile settings display, and allow you to further customize your options for appending authorities and override the profile settings. For example, you can select which cited authorities to append, link to documents on Westlaw to view the authorities, and view the listed authorities by category.

**COMPILING AUTHORITY**

1. Select the authorities you want to append to your document. You have the following options:
   - Select a section heading to include all authorities in a category (for example, Cases).
   - Select a document's check box to include an individual authority.
   - Select a category from the **Skip to Section** list to view authorities for a specific category (for example, Statutes).
   - Click the title of a document to view the document on Westlaw.
   - **Citation found** appears above non-unique citations, and allows you to select one or more of the associated documents to include.
   - **Possible citation found** appears above citations that are recognized but that have no target document.
   - **No citations found** appears under sections where no citations are recognized in that category.
   - **Out of plan** appears next to citations that are not covered in your Westlaw subscription.

2. Click **Compile**.

3. When the compilation is complete, click **Download** and choose whether to save or open the compiled document with the appended authorities.

Billing occurs when the compiled document is downloaded. Charges may be incurred for appended authorities that are not covered in your Westlaw subscription.

In the compiled document, hyperlinked citations in the table of authorities go to the appended authority. Hyperlinked citations in the appended authorities go to the full text of the document on Westlaw.
About Build Document

The Build Document tool allows you to build documents from templates that have been created by users in your organization using Thomson Reuters Contract Express or those created by Practical Law. After a document or collection of documents are created using an online questionnaire, all Drafting Assistant tools and features are available to use within the document.

To access templates created by your organization, a subscription to Contract Express is needed. Practical Law Automated Documents are available to all Practical Law subscribers.

The Build Document tool consists of three tabs:

- Use the **Browse** tab to search for or browse to templates created for your organization.
- Use the **Recents** tab to view templates that you have recently accessed.
- Use the **My Projects** to view the status of and access your recent projects.

Before you can begin using the Build Document tool, ensure that the link to your Contract Express subscription is configured (see "Configure Contract Express Integration" on page 82 for more information). Additional steps may also be needed to set up access to Practical Law Automated Documents (see "Configure Access to Practical Law Automated Documents" on page 84 for more information).

**Working with Build Document**

Use the Build Document tool to assemble documents from templates. Once the document is built from the template, all Drafting Assistant tools and functions can be used with the document.

**CREATING A NEW DOCUMENT**

To create a new document using the Build Document tool, complete the following:

1. Open Microsoft Word, access Drafting Assistant (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information), click the **DA** toolbar button, and click **Build Document** in the left pane.
2. Do one of the following:
   - On the Browse tab, enter a search term in the **Search templates...** field. When searching from this tag, results will be pulled from all sources to which you subscribe. From the results, click the template you want to build. A window may appear asking for your Contract Express credentials (email and password). Enter your credentials, and click **Log In**.
   - Click **Firm Templates** or **Practical Law** to access the list of templates from that source. From the list, click the template you want to build.
3. A separate window will open with a questionnaire. Enter all necessary information in the questionnaire, using the Previous and Next buttons to navigate. Click Preview to view the document in the questionnaire window as it is dynamically created.

- You can also download entries using the Download Answers button or upload previously created entries using the Upload Answers button (Contract Express templates only).
- At any time, click Save & Close to end the questionnaire. All answers will be saved, and it is possible to continue building the document at a later time. Additionally, an entry in the My Projects tab is created with an Incomplete status.

Once the questionnaire has been completed, a new instance of Microsoft Word opens with the completed document. Additionally, an entry in the My Projects tab is created with a Ready status.

All tools and features in Drafting Assistant can now be applied to this document.
ACCESSING AN INCOMPLETE DOCUMENT

To complete an unfinished document that has been saved or has saved answers, complete the following:

1. Open Microsoft Word, access Drafting Assistant (see ”Accessing Drafting Assistant Tools from Your Word Processor” on page 6 for more information), click the DA toolbar button, and click Build Document in the left pane.

2. On the My Projects tab, find and click the document you wish to complete. It will have a status of Incomplete. You can use Search, Sort By, or Filter to help you find a previous project. Click Edit Questionnaire, and the questionnaire will open in a new window with any previous answers populated.

3. Complete the questionnaire as necessary. Use the Previous and Next buttons to navigate. Click Preview to view the document in the questionnaire window as it is dynamically created.
4. Click Save & Close.

5. A new instance of Microsoft Word opens with the completed document. Additionally, the entry for this project in the My Projects tab will change from Incomplete to Ready.

All tools and features in Drafting Assistant can now be applied to this document.

**Configure Contract Express Integration**

To access your organization’s Contract Express templates from within Drafting Assistant, a link between the two applications must first be established. When configuring this link for the first time, any user in the organization can perform the configuration. Once the link has been established for one user, it is established for all users in the organization. If changes need to be made to the link after it has been established, only a user that has been designated as the Build Document Administrator can make those changes.

If your Contract Express server is hosted and maintained by Thomson Reuters, complete the steps under **Link Configuration for Hosted Contract Express**. If your Contract Express server is managed by your organization, complete the steps under **Link Configuration for On-Premise Contract Express**.

**LINK CONFIGURATION FOR HOSTED CONTRACT EXPRESS**

If your Contract Express server is hosted and maintained by Thomson Reuters, complete the following:

1. Open Microsoft Word, access Drafting Assistant (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information), and click the DA button on the Drafting Assistant toolbar.
2. Click your profile name at the bottom of the left navigation pane and then click System Preferences.
3. Under Configure Link to Your Contract Express Subscription, enter the Contract Express Server Location in the **Contract Express Server Location** text box. The Server URL is same as the URL that you use to access Contract Express on your browser (e.g., https://xxx.contractexpress.com/app).
4. Click OK.

You are now ready to use Contract Express with Drafting Assistant. To access your templates, click **Build Document**.

**LINK CONFIGURATION FOR ON-PREMISE CONTRACT EXPRESS**

If your Contract Express server is managed by your organization, complete the following:

1. Before you begin, contact your Contract Express Administrator for the following information:
   - Contract Express Server URL
   - Contract Express Identity Server URL
   - Contract Express Client ID for Drafting Assistant
   - Authorization Type
     *Note* If the Authorization Type includes an Authorization Code, ensure your administrator also provides this code.

2. Open Microsoft Word, access Drafting Assistant (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information), and click the **DA** button on the Drafting Assistant toolbar.

3. Click your profile name at the bottom of the left navigation pane and then click **System Preferences**.

4. Under Configure Link to Your Contract Express Subscription, enter the Contract Express Server Location in the **Contract Express Server Location** text box. The Server URL is same as the URL that you use to access Contract Express on your browser (e.g., `https://ceserver.mycompany.com`).

5. Before entering the remaining information, click **OK** to validate the server path.
6. Enter your Contract Express Client ID for Drafting Assistant in the **Contract Express Client ID** field. If your Administrator provided you with an Authorization Code instead of a Client ID, enter that in the field instead.

7. Enter your Contract Express Identity Server URL in the **Contract Express Identity Server** field (e.g., https://ceserver.mycompany.com/IdServ/core/connect).

8. Select the **Authorization Type** that matches the authorization type your Contract Express servers uses.

9. Click **OK**.

You are now ready to use Contract Express with Drafting Assistant. To access your templates, click **Build Document**.

**Configure Access to Practical Law Automated Documents**

If your organization acquires a subscription to Practical Law that includes access to Automated Documents powered by Contract Express, the link to those Automated Documents must be configured for access in Drafting Assistant.
To configure the link to access Practical Law Automated Documents, complete the following:

1. Open Microsoft Word, access Drafting Assistant (see "Accessing Drafting Assistant Tools from Your Word Processor" on page 6 for more information), and click the DA button on the Drafting Assistant toolbar.
2. Click Build Document in the left pane.
3. In the left pane, a blue message banner is displayed, reminding you to set up access to Automated Document. Click the link in the banner, and you will be taken to the Practical Law website.
4. In the browser window, enter your credentials to log into Westlaw and Practical Law.
5. On the Practical Law home page, click the Access My Automated Documents link in the lower right pane.

Once the Contract Express website and its Welcome page loads, access to Practical Law Automated Documents has been configured and the templates will be available.
